REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly discloses or renders obvious the claimed apparatus for the electrodialytic regeneration of an electroless bath electrolyte comprising first and second electrodialysis units, wherein in the first electrodialysis unit the diluate compartments are separated from the concentrate compartments on a cathode side by monovalent cation permeable membranes and on the anode side by anion permeable membranes, wherein in the second electrodialysis unit the diluate compartments are separated from the concentrate compartments on a cathode side by monovalent anion membranes and on the anode side by cation selective membranes, wherein the diluate compartments of the first unit are serially connected to the diluate compartments of the second unit via first lines through which the bath electrolyte is sequentially channeled, wherein the concentrate compartments of the first unit are serially connected to the concentrate compartments of the second unit via second lines through which the regeneration electrolyte is sequentially channeled, wherein the electrodes in the electrode compartments are separated from adjacent compartments by membranes and electrolyte flows therethrough via third lines and wherein one of said electrode

compartments adjacent to the compartments of both electrodialysis units houses an electrode which is shared by both the first and second electrodialysis units.

The prior art uses a different arrangement of membranes and would not provide the improved results disclosed in the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
